PROFESSIONAL SUMMARY

Senior Software Developer with 7+ years of experience specializing in Native Android (Kotlin, Jetpack Compose) and Flutter (Dart) development. Proven track record architecting and deploying scalable, high-performance mobile applications across 14+ countries (UK, Ireland, and beyond) serving 400+ enterprise sites. Led native-to-cross-platform migration achieving 40% reduction in maintenance overhead. Expert in IoT hardware integration, global payment gateways (FreedomPay, Pine Labs, Razorpay), real-time Firebase systems, and on-device AI/ML with LiteRT and ML Kit. Skilled practitioner of AI-assisted development with Cursor, Claude, and Gemini.

TECHNICAL SKILLS

Languages	Kotlin, Dart, Java, Python, JavaScript, HTML, CSS, Swift
Mobile Frameworks	Android SDK, Jetpack Compose, Flutter, Java Android
Architecture & Patterns	Clean Architecture, MVVM, MVI, BLoC, Provider, Dagger Hilt, Repository Pattern, TDD/BDD, Kotlin Flow, Coroutines
IoT & Hardware	Sunmi SDK, Zebra SDK, Bixolon, Thermal ESC/POS Printers, Barcode/QR Scanners, BLE/Bluetooth
Payments	FreedomPay, Pine Labs, Razorpay
AI/ML	LiteRT (TFLite), Google AI Edge, ML Kit, CameraX, Ollama (RAG), Local LLMs, Piper TTS, FAISS
Backend & Cloud	Firebase (Firestore, Realtime DB, Auth), REST APIs (Retrofit, Volley, Dio), Room, SQLite
DevOps & Tools	Git, GitHub, CI/CD, Gradle, Cursor IDE, Android Studio, Xcode

PROFESSIONAL EXPERIENCE

Senior Software Developer	May 2022 – Present
SmartQ (Bottle Lab Technology Pvt Ltd) — Bengaluru, India Technology arm of Compass Group	
- Architected and deployed a multi-country Self-Service Kiosk platform live across 400+ enterprise sites in 14+ countries (UK, Ireland, and more), powering Compass Group cafeteria operations. - Integrated global payment gateways — FreedomPay and Pine Labs — enabling contactless, card, and QR-based transactions with deep terminal SDK handshakes. - Built Real-Time Token Display System (TDS) using Firebase Realtime DB: live preparing/ready state transitions, multi-restaurant aggregated views, idle media rotation (ExoPlayer video, Lottie animations). - Developed Intelligent Menu Display (IMD): large-format multi-restaurant menu with live OFS sync for real-time item availability, intelligent banner scheduler, and dynamic price/tax rendering.	

- Integrated thermal receipt printers (Sunmi, Zebra, Bixolon) and barcode/QR scanners via custom ESC/POS command buffers and hardware SDKs.
- Engineered automated store closure logic and complex country-specific tax calculation engines for multi-region compliance.
- Led strategic migration of core legacy Native Kotlin codebase to Flutter, achieving **40% reduction in maintenance overhead** while preserving low-level device operations.

Software Engineer

August 2021 – April 2022

Cognitive Cloud Pvt Ltd — Bengaluru, India

- Developed secure, HIPAA-compliant Android mobile applications with robust local data encryption and high-concurrency threading for real-time patient vitals processing.
- Implemented TDD protocols with JUnit and Mockito test suites; achieved **25% reduction in post-launch crash rates**.
- Conducted code reviews and enforced strict data integrity standards for sensitive healthcare data handling.

Software Engineer

January 2019 – July 2021

Aislyn Technologies Pvt Ltd — Bengaluru, India

- Built Aislyn Learn App: native Android edtech platform with 15+ paid course tracks, Razorpay payment checkout, Google Sign-In, ExoPlayer video streaming, and Volley-backed PHP REST APIs.
- Developed Dementia Care Companion (Aumetra): Flutter app polling remote vitals (SpO2, BP) every 10 seconds via IoT health APIs, with condition-aware therapeutic audio and local SQLite authentication.
- Engineered QR Smart Parking: native Android Java app with ZXing QR scanner, 4 live slot tracking (10s auto-refresh), prepaid wallet, and Retrofit API services.
- Designed and deployed Gurushree Hospital responsive multi-page website using HTML/CSS/JS with team search engine and full mobile-first layout.
- Developed Android applications interfacing with Bluetooth Low Energy (BLE) peripherals and IoT health sensors for healthcare and education clients.

FEATURED PROJECTS

AI Object Detection App (ML Kit & LiteRT / Google AI Edge)

2026

- Designed and shipped a premium Jetpack Compose Android app with real-time on-device object detection using ML Kit and Google AI Edge LiteRT (SSD MobileNet) via CameraX.
- Implemented live multi-pipeline hot-swapping, glassmorphic HUD dashboard, interactive neon bounding boxes, pinch-to-zoom, and greedy IoU temporal stabilization to eliminate box flickering.
- *Stack: Kotlin, Jetpack Compose, LiteRT (TFLite), ML Kit, CameraX, MVVM, Clean Architecture*

RoPac — Offline Personal AI Assistant (Flutter + Python + Ollama)

2025–2026

- Built a 100% offline, privacy-first personal AI assistant using Flutter (macOS/Android), Python bridge, Ollama LLM, FAISS vector search, RAG pipeline, and Whisper.cpp speech recognition.
- Engineered hybrid semantic + BM25 search, Piper TTS voice output, PBKDF2 local authentication, and full document ingestion pipeline.

- *Stack: Flutter, Python, Ollama, FAISS, Whisper.cpp, Piper TTS, nomic-embed-text, RAG, MVVM*

SecureVault — Cross-Platform Password Manager2025

- Created an AES-encrypted local credential manager in Flutter with biometric authentication, secure clipboard cleaning, and zero cloud data exposure. Shipped on Android, iOS, and Web.
- *Stack: Flutter, Dart, SQLite, AES Encryption, Biometrics, Provider*

SmartQ Enterprise Platform (TDS / IMD / Self-Service Kiosk)2022–Present

- Three production products live across 400+ sites in 14+ countries as part of Compass Group's Time2eat digital F&B ecosystem — Token Display System, Intelligent Menu Display, and Self-Service Ordering Kiosk.
- *Stack: Flutter, Kotlin, Jetpack Compose, Firebase, FreedomPay, Pine Labs, Sunmi/Zebra SDK, Clean Architecture, BLoC, MVVM*

EDUCATION

Bachelor of Computer Applications (BCA)2019

East West College, Bangalore University | CGPA: 7.5

Higher Secondary (12th Science)2016

Hema Convent School, MP Board | Score: 75%

Thank you for taking the time to review my profile. I am excited about the opportunity to bring my experience in Android and Flutter development, IoT hardware integration, and AI-assisted engineering to your team. I look forward to discussing how I can contribute to your organization's goals.
